

# SETUP FOR WINDOWS VISTA USERS

1. Install the original CD that came with your GPS device.
2. Follow the directions in the guide that came with the CD.
3. Finish the installation and remove the CD from the computer (Very Important!)
4. Go to [www.landairsea.com](http://www.landairsea.com). At the bottom of the home page, click on Support/Downloads. Click on the update for VISTA users. Select Save and save the file to your desktop. When it is done downloading, click Open or Run. If you do not have this option, you can find the new icon on your desktop and double click on it from there.
5. When installing, make sure to select INTERNATIONAL USERS ONLY, or the installation won't work. Click Next for all the other options.
6. Connect the device to computer via the USB port. Windows should then try and install the device automatically and you should get a message that says that your hardware was installed and working properly. If not please move on to step A.
  - A. If the device does not automatically install to the computer, go to your Start menu and find "Computer." Right click and select "Manage"
  - B. Under "System Tools," you will find "Device Manager." In the device manager, you will look under "Other Devices" or "Ports" and look for either Antaris® 4 GPS Receiver or LAS Tracking Key.
  - C. Right click on it and select "Update Driver." This should successfully install the LAS GPS Tracking Device on your Windows Vista operating system.
